# About Us

Olindias is an international IT Company that supports software as a service business launch specialized in Artificial Intelligence.

---

**Vision :** Together, we'll author a story of impactful change through revolutionary software solutions.

---

**Expertise :** Olindias provides an AI search and recommendation solution that can easily integrate into any platform—from e-commerce to e-learning and more. Our AI is designed to understand what users truly need, helping them find the right solutions quickly and efficiently.

OLINDIAS

# Our Values

We believe in the transformative power of technology and we're dedicated to:

## 1. Innovation

Empowering people and businesses to grow together.

## 2. Credibility

Strengthening trust within the startup ecosystem.

## 3. Impact

Building a SPAM-FREE digital future together!

# Internship Theme

# AI-Enhanced SaaS Development for Startup Growth Insights

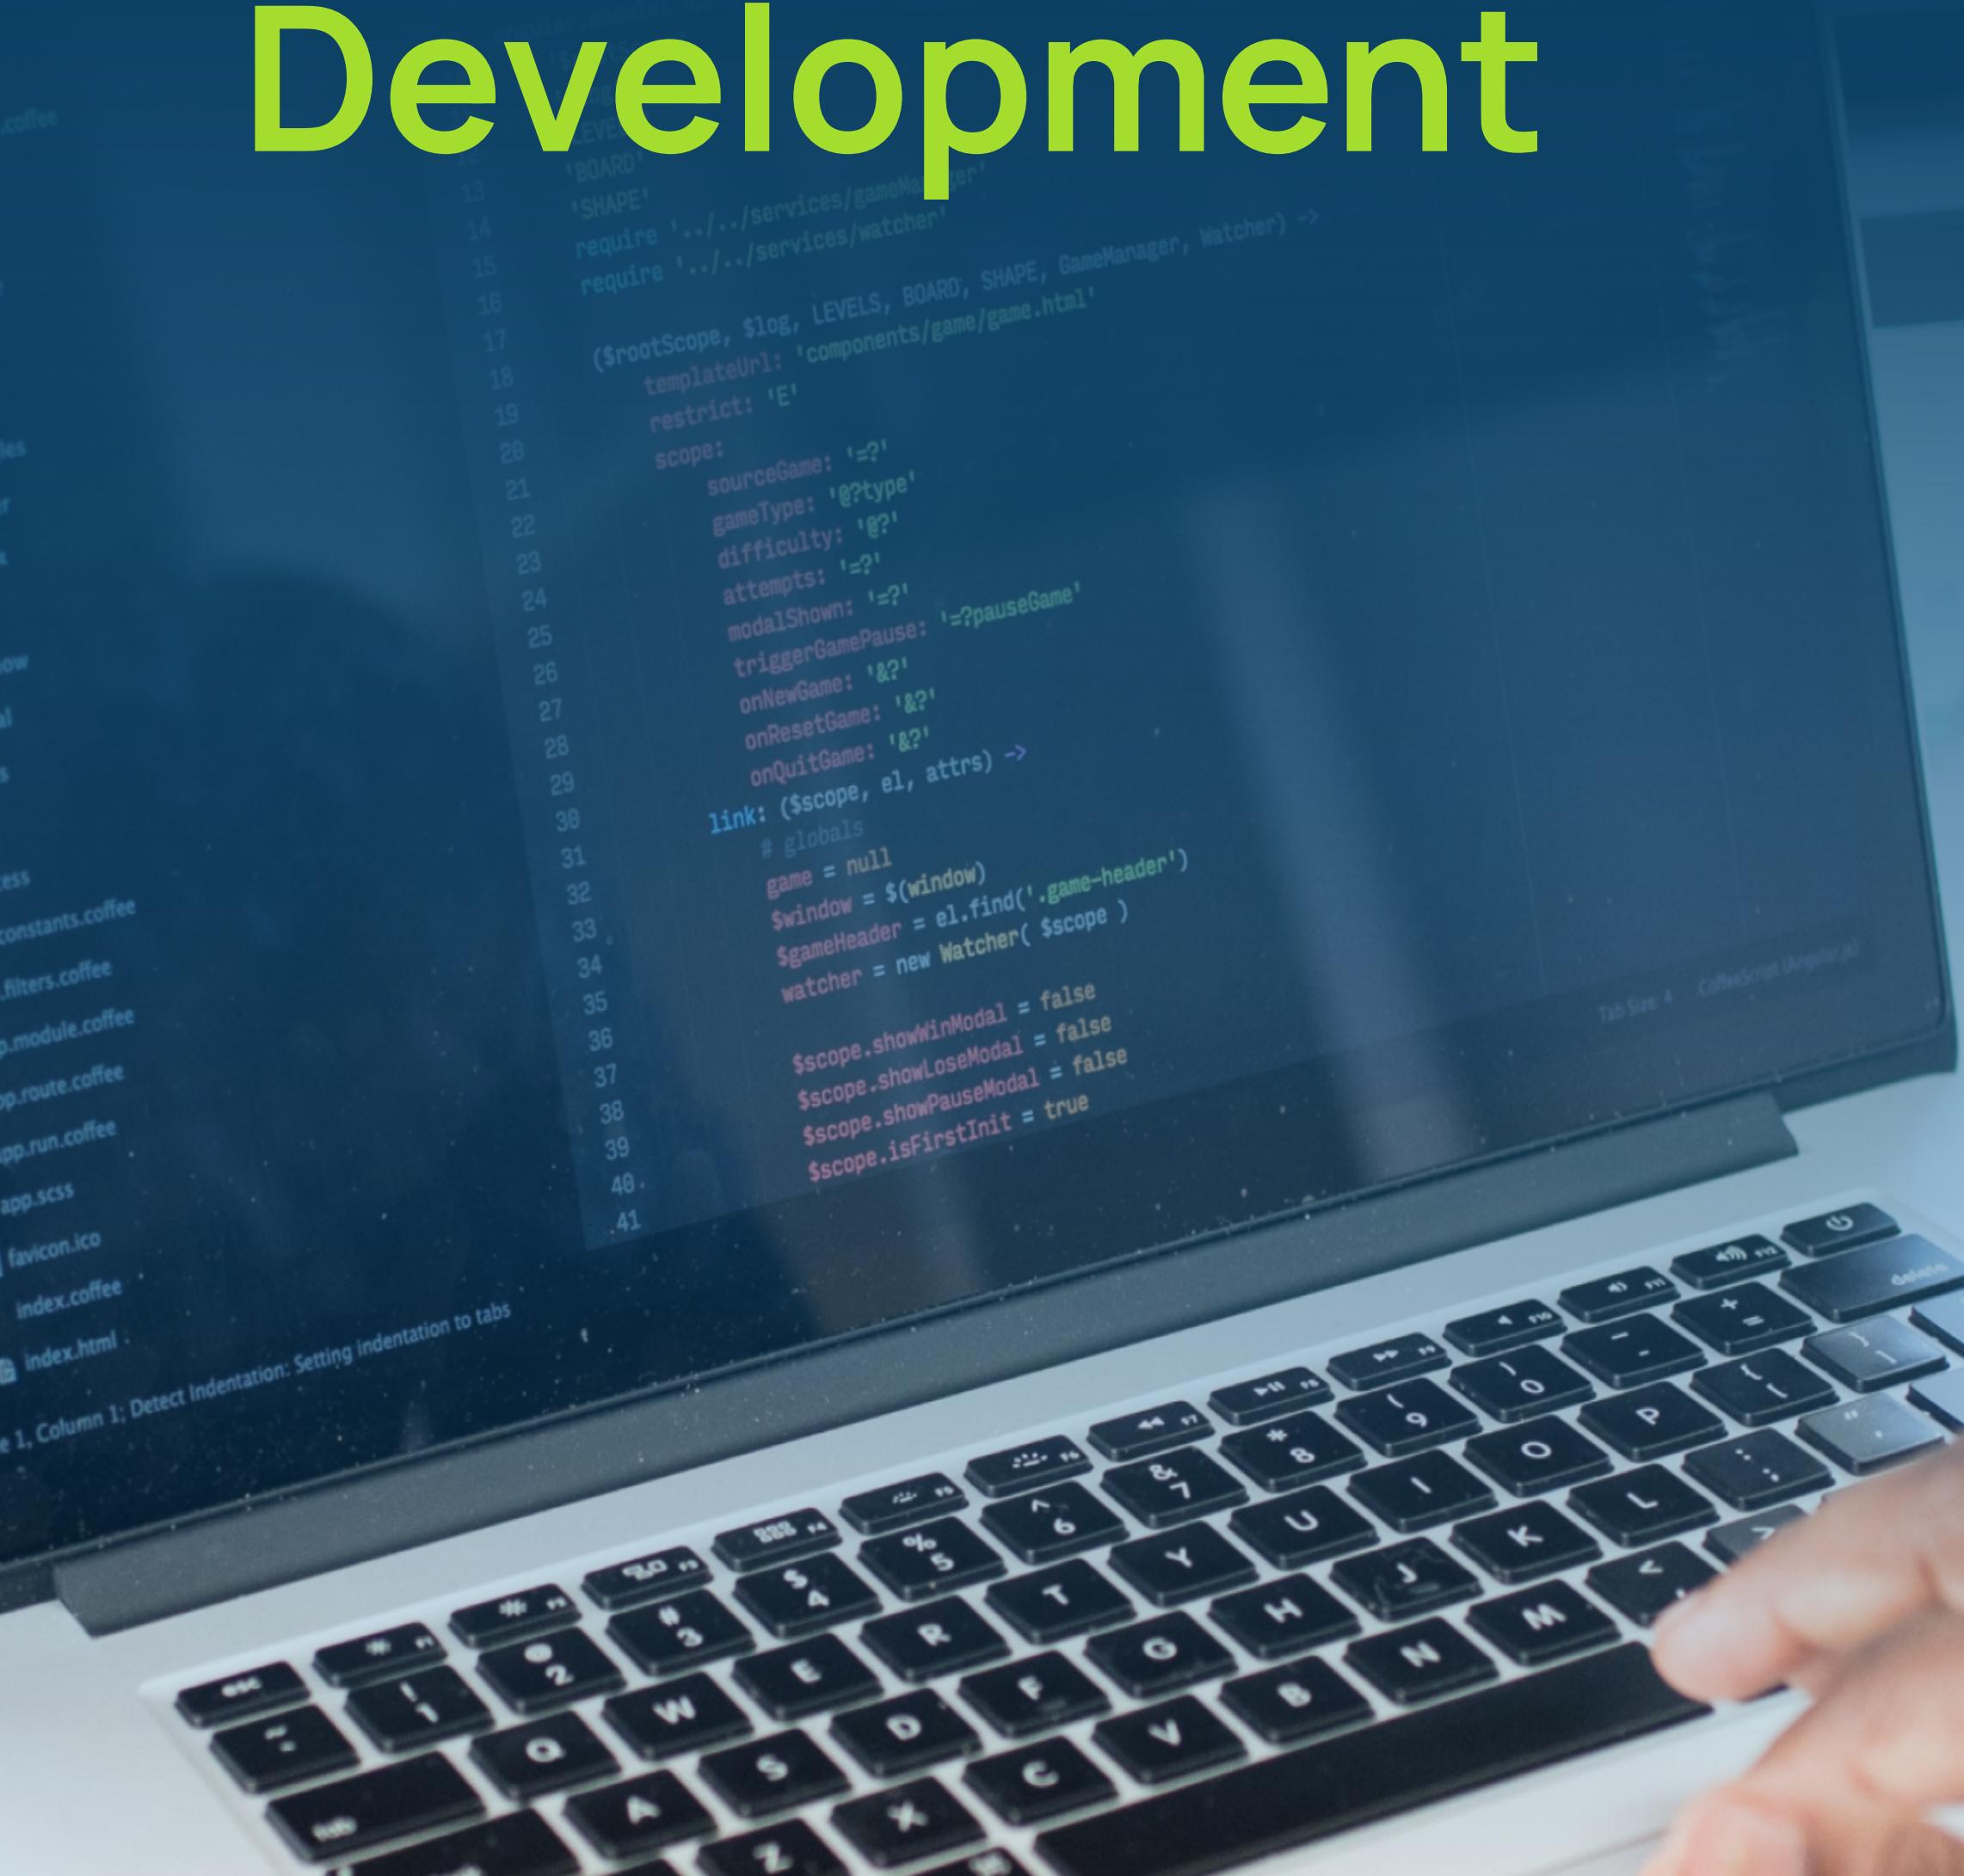

In today's fast-paced startup investment ecosystem, leveraging Artificial Intelligence has become essential for optimizing investor-startup connections and tracking growth potential.

This project aims to expand the capabilities of an existing AI-Enhanced SaaS Platform by introducing new features focused on advanced growth insights and intelligent matchmaking. With additions like real-time data tracking, predictive growth analytics, and personalized recommendations, the platform will empower investors with valuable insights and help startups gain visibility and traction in their growth journey.

# Our Positions

# Full Stack Development

## Subject 1:

### Mission

Development of SaaS for the next generation of investment automation.

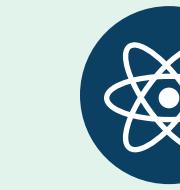

### Technologies

Node.Js

MongoDB

React .Js

Tensorflow.js

Express.Js

NLP.js

### Duration

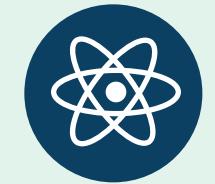

4-6 Months

# Subject 2:

## Mission

Web development theme for the next generation of investment automation and chatbot plugin dedicated to customer service.

## Technologies

React.js

Angular.js

Wordpress

## Duration

4-6 Months

# Web Development

```
async ratingPromptCheck() {  
  // Check if the rating group is enabled or not  
  let ratingGroupDisabled = await Cache.get('ratingGroupDisabled');  
  
  if(ratingGroupDisabled) {  
    // Check if the timer is set or not  
    let ratingPromptTimer = await Cache.get('ratingPromptTimer');  
  
    if(ratingPromptTimer) {  
      Cache.set('ratingPromptTimer', '_now') + 1000;  
    } else {  
      if(ratingPromptTimer < '_now') + 1000 - ratingPromptTime +  
        this.displayRatingPrompt();  
    }  
  }  
  
  await displayRatingPrompt();  
  Client.alert(  
    'May we ask for a quick rating?',  
    'Leave us a 5 star rating if you enjoy the app, thank you very much!',  
    {text: 'Not now', onpress: () => {  
      // Reset the timer  
      Cache.set('ratingPromptTimer', '_now') + 1000;  
    }}  
);  
}
```
